

# Master Your Seint Beauty Routine

## 1 Skin Care

---

- **Double Cleansing Method**
  - Remove Seint with Refresh Wipes or Microfiber Cloth
  - Gentle face wash for second cleaning
- **Moisturize**
  - Morning & Evening
  - Wait at least 20 minutes before applying Seint foundation
- **Exfoliate at least twice a week**
- **Don't forget your SPF!**

## 2 Primer

---

Seint products do not need a primer but may benefit from one if you have oily skin and/or large pores or fine lines

## 3 Adjustment Period

---

A typical adjustment period for new products is about 1-2 weeks for your skin to adjust to your new routine. Be patient and feel free to reach out if you feel it's not wearing how you desired.

## 4 Hair Removal

---

If you notice your makeup sticking to your peach fuzz versus your skin, you may want to consider shaving your face for a smooth application. (Tinkle Razors are great!) And no, your hair will not grow back thicker, promise!

## 5 Setting Spray or Powder

---

Set your face with Vanilla Dust for a matte finish or try our Stay Spray for a dewy finish

## 6 Clean your tools

---

A perfect application and skin care routine can't save you from what happens if you use dirty tools. Clean your brushes and tools at least once a week. Ask your Artist about our Brush Cleanser!

Remember to use a light hand for buildable coverage. Contact your artist if you want to learn how to conceal blemishes, color correct, maximize your compact or notice any color or texture issues.
